GRANTEE 35821 1st yr. Oct 1994

June 3, 1994

Arthur D. Eisenberg
Associate Research Director
The Council for Tobacco Research - USA, Inc.
900 Third Avenue
New York, NY 10022

1K

Dear Dr. Eisenberg:

We are pleased to announce the 1994 Albany Conference, ***RNA Editing: An Evolving Mechanism of Gene Regulation,*** to be held **October 6-9** at the Rensselaerville Conference Center. The enclosed materials describe the history of The Albany Conferences and provide details of and an application for the upcoming meeting.

RNA editing is of more than theoretical interest to scientists. Originally discovered in parasites, various RNA editing processes have been found more recently in viruses, cancer cells and cholesterol metabolism. RNA editing may well become the basis for new intervention strategies in infectious disease, cardiovascular disease and cancer. The presence of this mechanism for gene regulation in the nervous system and in plants suggests neurobiological and agricultural applications as well.

We are grateful for your interest in previous conferences and are confident that this meeting will again be of value to your company. We are seeking contributions to support the conference. Donation levels range from $500 to $5,000, and all benefactors will be acknowledged in the printed program. If you are aware of a more appropriate recipient of this request at The Council for Tobacco Research, we would appreciate your passing on this material. Please feel free to call me at (518) 442-4327 with any questions.

Sincerely,

C A Mannella

Carmen A. Mannella
Director, Pathology
Wadsworth Center for Labs and Research, NYSDOH
Professor, Biomedical Sciences
School of Public Health, UASUNY
